Subject: APS proposed changes

ORIGINAL

Hello Mr. Newman,

I have a couple of questions that I would like for you to mull over when you guys review APS's new suggestion on the rebate program. Rather than penalize everyone without notice why not pay rebate based on performance? This way if people install poor quality systems they would get less rebate. When a quality system is installed it produces more KWH and then would receive a higher rebate. This what SRP has done for its commercial systems and we love it. It really weeds out the sub quality installations. This keeps the industry moving forward.

I would also like to see all of my customers who submitted the reservation on the 31st be allowed to receive the full \$3.00 in rebate.

Just some thoughts.

David Brady
